#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-7 are rejected under 35 U.S.C. 102(e) as being anticipated by Lee (US Pre-Grant Publication 2004/0115519).

Lee teaches a rechargeable battery pack that can be made of a lithium ion batter that includes a circuit board used to ensure safe use of the battery (abstract). This battery pack can be made to fit AA, AAA, C, or D standard batteries ([0003]). The batteries are housed in a cover that is capable of containing two or more batteries (Figure 1; [0007]; [0033]).

The battery pack contains at least one circuit board that is designed to ensure safe operation of the battery (Figure 1; Figure 11; [0008]; [0009]; [0036]; [0070]-[0073]). The circuit board is programmed to prevent overcharging using a cut-off switch to prevent charging of a lithium-ion battery above 4.2 V. Specifically, the battery can be charged from 3-4.2 V. The circuit board also prevents over-discharge by stopping discharge below 2.7 V.

The two batteries in the embodiment for AA or AAA packs are connected in parallel (Figure 5; Figure 6; [0048]).
